FIRE SUPPRESSION SYSTEMS

AQUEOUS VERMICULITE DISPERSION (AVD) FIRE EXTINGUISHING

- AVD is practically effective when applied in a form of a mist
- AVD is suitable for application for both portable extinguishers and fixed systems
- AVD encapsulates the fuel source and insulates the cells preventing further thermal runaway; this prevents the propagation of the fire
- The system can be designed to suit the specific requirements of the location and application
- AVD is Dielectric Test approved in line with BS EN 3-7: 2004 + A1: 2007
